EDUCATION

Bachelor of Technology in Computer Science

Dronacharya College of Engineering

Gurugram, Haryana, India

Oct. 2022 – Jun. 2026

EXPERIENCE

Software Developer Intern

Mar. 2026 – Present

Octalucet Software Solutions

Hybrid, India

- Fixed production UI bugs across responsiveness, layout, CSS, and client state management.
- Modularized shared TypeScript types and feature logic, making the production codebase easier to extend.
- Simplified backend and database code paths, reducing structural complexity and improving performance.

Software Development Engineer Intern

Sept. 2025 – Feb. 2026

Paradize Space

Remote, India

- Built the platform for documenting and sharing hardware projects with reusable build specifications.
- Developed core features for publishing, discovering, and replicating hardware projects.
- Contributed to the marketplace and research infrastructure for the hardware builder ecosystem.

Full Stack Engineer Intern

Jun. 2024 – Aug. 2024

Datawave Labs

Remote, India

- Built a Python **monitoring agent** with watchdog that flagged data discrepancies in live business workflows.
- Built a **text-to-SQL** translator with a React and Tailwind UI, and measured accuracy and performance on Snowflake.
- Compared multiple **LLMs** on accuracy and production fit for the text-to-SQL translator.

TECHNICAL PROJECTS

LidFx | JavaScript, GLSL, Python, GNOME Shell, Wayland

Sept. 2026

- Built a **GNOME Shell extension** that folds and blurs the live Wayland desktop as the laptop lid closes.
- Read lid angle from IIO, IMUs, HID, a webcam, or the lid switch, and warped the desktop in GLSL.
- Shipped it as a Shell extension zip and a Debian package for GNOME Shell 45–48.

DUM-E | TypeScript, Bun, OpenTUI, React, Hono, Drizzle, PostgreSQL

Aug. 2026

- Built a terminal **coding agent** that reads, searches, edits, and runs commands inside a local repository.
- Implemented a streaming **tool-calling** loop on the Vercel AI SDK, with session history stored in Postgres.
- Added **Plan and Build modes** so the agent is either read-only or allowed to write files and run a shell.

FillIt | TypeScript, React, Vite, Chrome MV3, Transformers.js, ONNX Runtime

Jul. 2026

- Built a **Chrome extension** that fills job and web forms from a local profile, on-device, with no API keys.
- Mapped fields with synonyms, fuzzy matching, optional **MiniLM** embeddings, and stored experience.
- Imported resumes and LinkedIn exports, remembered per-domain answers, and skipped passwords, payments, and CAPTCHAs.

Weavr | Next.js, TypeScript, tRPC, Inngest, Better Auth, Prisma, Tailwind CSS

Oct. 2025

- Built a **workflow automation** platform for designing and running custom multi-step task flows.
- Executed flows as Inngest jobs through tRPC, with Better Auth and workflow state stored in Postgres.
- Automated **50+ repetitive tasks** and reduced workflow execution time by **25%**.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, C++, SQL
- **Frameworks:** Next.js, React, Node.js, Hono, Express, FastAPI, tRPC, Tailwind CSS, Zustand
- **AI & Data:** Vercel AI SDK, Transformers.js, PostgreSQL, MongoDB, Snowflake, Prisma, Redis, Pandas
- **Infrastructure:** Docker, AWS (Lambda, EC2), Nginx, Grafana, Prometheus, Git, Neovim, WebSockets

LEADERSHIP & ACHIEVEMENTS

- **Gurugram University Ideathon:** First place, travel product, given by Nayab Singh Saini, Chief Minister of Haryana.
- **HACK KRMU:** Won the AI/ML track (Mar. 2024).
- **Deviators Club:** Co-founded the club for open-source work and peer learning, Feb. 2024 – Apr. 2025.
- **Devolympus:** Organized a 36-hour hackathon at Dronacharya College of Engineering.
- **IDE Bootcamp:** Qualified for Phase 1 of Edition 2, a national entrepreneurship program.
